

AIR COMPRESSOR ASSEMBLY HAVING ENCLOSED  
UNPAINTED AIR TANK

ABSTRACT

An air compressor assembly having an unpainted air tank that is enclosed in a shroud. The air tank may be made of metal, plastic, or the like. In a preferred embodiment, the shroud is made of plastic. The shroud may also be made of metal or the like. The air compressor assembly according to the present invention may be formed in various styles, including a portable type air compressor assembly, a "pancake" type air compressor assembly, a "hot-dog" type air compressor assembly, a vertical "hot-dog" type air compressor assembly, a vertical stationary type air compressor assembly, a "double hot-dog" type air compressor assembly, and the like.
